Java Developer | Embedded Java | Microservices & Layered Architecture | AWS Solutions Architect | AI/LLM Integration

Professional Summary

Java Developer with 3.5+ years of industry experience, including 2.5+ years of writing embedded Java software that runs on Daimler trucks and buses as part of a secure over-the-air update system supporting 1M+ connected devices. Also experienced in JUnit testing, CI/CD release automation, GraalVM Native Image, and AWS-hosted RAG tooling built on self-hosted LLMs. AWS Certified Solutions Architect – Associate with an M.Tech in Computer Science from NIT Calicut.

Technical Skills

Languages & Frameworks: Java, Spring Boot, JUnit, Maven, Gradle, Python, C/C++, Bash, SQL, PostgreSQL
Embedded & Design: Embedded Java, OTA Firmware/Parameter Updates, Vehicle Diagnostics, OOP, SOLID, Design Patterns, REST, API Design, Microservices
Cloud & Delivery: AWS (EKS, VPC, S3, ECS), Docker, Kubernetes, GraalVM Native Image, Git, GitHub Actions, CI/CD, Release Automation
AI/GenAI: RAG, LLM Integration (Claude, OpenAI), Embeddings, Semantic Search, Self-Hosted LLMs (Qwen, Llama), Prompt Engineering, Token Optimization, Agent Orchestration
Engineering Practices: System Design, Code Review, Agile/Scrum, Mentoring

Professional Experience

Daimler Truck Innovation Center India — Bengaluru, India
Software Engineer (Java) — *Mar 2024 – Present*

- Developed, and fully owned selected features of, the Java software that runs on-device in Daimler trucks and buses to receive and apply firmware and parameter updates to ECUs from a cloud-connected platform, supporting 1M+ connected vehicles across 5+ products, including passive data collection and over-the-air troubleshooting.
- Designed a backward-compatible integration layer for legacy platforms, preserving interface stability while extending the system lifecycle.
- Contributed to the migration of a Java application to GraalVM Native Image, reducing startup time from 2–3 minutes to approximately 40 seconds compared with traditional JVM/JIT-based startup.
- Implemented GitHub Actions release automation for packaging and deployment, reducing deployment time by 40% and manual release errors by 90% across 4 teams.
- Developed a Python static-analysis tool for a proprietary diagnostics domain-specific language, reducing code-review cycle time by 30%; automated test-bench operations, cutting manual testing time by 50%.
- Built a RAG-based code-review and defect-prediction tool over Jira and Bitbucket data, achieving 80% prediction accuracy for recurring defects and enabling early risk detection for 50+ engineers.
- Deployed the tool as a Docker image on Amazon EKS, running self-hosted Qwen and Llama models inside a VPC so that code and defect data remained private; used embeddings-based retrieval to supply only relevant context, reducing hallucinations, and compact prompting to cut token usage.

Tata Consultancy Services (TCS) — Pune, India
Systems Engineer – Enterprise Platform Integrations — *Jun 2021 – Jul 2022*

- Managed a ServiceNow and SharePoint migration for a 500+ user enterprise client, coordinating configuration, data migration, and cutover across 3 cross-functional teams with zero downtime.
- Developed 5+ ServiceNow inbound actions and REST API integrations; validated end to end with Postman and resolved 20+ integration defects for stable production releases.

Education

National Institute of Technology Calicut — Kerala, India
M.Tech in Computer Science and Engineering — *Aug 2022 – Mar 2024 | CGPA: 8.62/10*

Dr. J. J. Magdum College of Engineering, Jaysingpur — Maharashtra, India
B.E. in Computer Science and Engineering — *Aug 2017 – Jun 2021 | CGPA: 8.40/10*

Research & Publications

M.Tech Thesis, NIT Calicut – Minimum Link Watchman Route Problem — 2024

- Analyzed the computational complexity of route-planning variants on geometric arrangements, producing formal proofs and a published paper.

Certifications & Achievements

AWS Certified Solutions Architect – Associate (SAA-C03);

Microsoft Azure Fundamentals (AZ-900);

IBM Data Science Methodology and **Machine Learning with Python** (IBM)

GATE CSE: **96.37 percentile**; solved **500+ DSA problems** on LeetCode and GeeksforGeeks.
