Java Developer | Software Architecture & System Design | Cloud-Native (AWS) | AI/LLM Integration

Professional Summary

Backend Java engineer with **5+ years of combined industry and research experience** building cloud-native services and internal platforms. Strong in **system design, microservices, API design, and CI/CD automation** for connected-vehicle ecosystems at **a scale of 1M+ endpoints**. Built an **AWS-hosted RAG/LLM tool** adopted by **50+ engineers** to improve defect triage and test prioritization. **AWS Certified Solutions Architect**.

Technical Skills

Languages: Java, Python, SQL, Bash, C/C++
Backend & Design: microservices, distributed systems, REST/gRPC/SOAP, API versioning, contract-first, OOP, SOLID, design patterns, event-driven architecture
Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD, release automation
Data & Messaging: PostgreSQL, MySQL, Kafka, data modeling
GenAI: RAG pipelines, embeddings, semantic search, LLM integration (OpenAI/Claude), prompt engineering

Professional Experience

Daimler Truck Innovation Center India — Bengaluru, India
Software Engineer (Java) — Embedded Systems Engineer — *Mar 2024 – Present*

- **System architecture (Java)**: Contributed to the design of a secure software-update and diagnostics workflow by defining clean component boundaries and APIs across validation, orchestration, and execution layers.
- **System ownership at scale**: Delivered features for a connected-device platform supporting **1M+ endpoints globally**; maintained **5+ products** used by validation and release organizations.
- **GenAI/RAG on AWS**: Built and deployed an AWS-hosted RAG system using Jira/Bitbucket history to surface recurring defects; achieved **80%** prediction performance on historical data and is used by **50+ engineers**.
- **CI/CD & release engineering**: Implemented GitHub Actions-based packaging and deployment automation, reducing deployment time by **40%** and cutting manual release errors by **90%** across **3 teams**.
- **Mentoring & developer productivity**: Mentored **2 junior engineers** and built a Python static-analysis tool for an internal scripting DSL, reducing review cycle time by **30%**.

Tata Consultancy Services (TCS) — Pune, India
Systems Engineer — Platform Integrations — *Jul 2021 – Jul 2022*

- **Enterprise migration delivery**: Executed ServiceNow + SharePoint migration for a **500+ user** client, coordinating data migration and cutover across **3 teams** with **zero downtime**.
- **API integrations**: Built **5+** inbound workflows and REST integrations; validated end-to-end with Postman and resolved **20+** defects for stable production releases.

Education

National Institute of Technology Calicut
M.Tech in Computer Science and Engineering — *CGPA: 8.62 / 10 | 2024*

Dr. J. J. Magdum College of Engineering, Jaysingpur
B.E. in Computer Science and Engineering — *CGPA: 8.40 / 10 | 2021*

Research & Publications

National Institute of Technology Calicut — Kerala, India
Algorithms & Computational Geometry (M.Tech Research) — *2023 – 2024*

- Published research on complexity results for Minimum Link Watchman Route problem variants; formal proofs and peer-reviewed publication. [Link]

Dr. J. J. Magdum College of Engineering — Jaysingpur, India
Heart Disease Prediction using Machine Learning (B.E. Project) — *2021*

- Built ML models using scikit-learn (including ensemble methods) and applied feature selection to improve prediction quality. [Link]
