Senior Backend & Platform Engineer | Software Architecture & System Design | Cloud-Native (AWS) | AI/LLM Integration

PROFESSIONAL SUMMARY

Backend and platform engineer with **5+ years of combined industry and research experience** in Java and Python. Designs systems, defines APIs, and makes architectural decisions for fleet-scale platforms serving **1M+ connected vehicles**. Built **AI/RAG tools** now used by **50+ engineers**. **AWS Certified Solutions Architect** with hands-on experience in cloud-native development, CI/CD automation, mentoring junior engineers, and working across teams.

TECHNICAL SKILLS

Languages: Java (Maven, Gradle), Python, C/C++, Shell (Bash), SQL
Architecture & Design: system design, microservices, API design (REST, SOAP, gRPC), contract-first development, OOP, SOLID principles, design patterns, event-driven architecture, domain-driven design
AI/GenAI: RAG pipelines, LLM integration (Anthropic Claude, OpenAI), embeddings, semantic search, prompt engineering, agent orchestration, MCP
Cloud & Infrastructure: AWS (Solutions Architect certified), Microsoft Azure, Docker, Kubernetes
Data & Messaging: PostgreSQL, MySQL, Kafka, data modeling
DevOps & Tooling: GitHub Actions, CI/CD pipelines, Git, release automation
Leadership & Practices: technical leadership, mentoring, code review, technical documentation, Agile/Scrum, cross-functional collaboration, stakeholder management

PROFESSIONAL EXPERIENCE

Daimler Truck Innovation Center India

Bengaluru, India

Software Engineer (Java) — Global xOTA Developer

Mar 2024 – Present

- Contributed to the architecture of the OTA and UDS-diagnostics platform — designed and developed clean, robust component boundaries across validation, orchestration, and execution layers with a focus on product feasibility; the system supports monthly field tests and has been deployed on **7800+ customer trucks** in production.
- Delivered OTA/FOTA software for Daimler Truck's connected vehicle platform supporting **1M+ trucks and buses globally**; owned and maintained **8+ fleet-scale scripting capabilities** including DTNA-specific regulatory features (CARB24).
- Led design and development of a workshop mobile-update proof of concept for secure truck software updates via mobile app; presented results to **senior leadership**, validating feasibility for **3 operational scenarios**.
- Built and deployed an AWS-hosted RAG-based bug prediction system integrating Jira and Bitbucket data; reached **80% prediction accuracy** for resurfacing bugs, now used by **50+ engineers** in the validation organization for early risk signals and test prioritization.
- Designed backward-compatible integration layer for **legacy telematics platforms** (FOTA Retro), maintaining interface stability while extending platform lifecycle across **older vehicle generations**.
- Mentored **2 junior engineers** on diagnostic scripting best practices and built a Python linter for Daimler's proprietary diagnostic language (ODT), cutting code review cycle time by **30%**.
- Set up release automation for packaging and deployment pipelines via GitHub Actions, reducing deployment time by **40%** and cutting manual release errors by **90%** across **4 teams**.
- Automated vehicle test bench operations using Python and FTDI relay modules, reducing manual testing time by **50%** and improving repeatability across **8 test scenarios**.

Tata Consultancy Services (TCS)

Pune, India

Systems Engineer — Enterprise Platform Integrations

Jul 2021 – Jul 2022

- Managed ServiceNow and SharePoint platform migration for a **500+ user** enterprise client, coordinating configuration, data migration, and cutover across **3 cross-functional teams** with **zero downtime**.
- Developed **5+ ServiceNow inbound actions** and REST API integrations; performed end-to-end API validation using Postman, resolving **20+ integration defects** to ensure stable production releases.

EDUCATION

National Institute of Technology Calicut

M.Tech in Computer Science and Engineering

CGPA: 8.62 / 10 | Graduated 2024

Dr. J. J. Magdum College of Engineering, Jaysingpur

B.E. in Computer Science and Engineering

CGPA: 8.40 / 10 | Graduated 2021

RESEARCH & PUBLICATIONS

National Institute of Technology Calicut

Kerala, India

M.Tech Research — Computational Geometry & Algorithm Design

2023 – 2024

- Investigated complexity results for Minimum Link Watchman Route problem variants on geometric arrangements; produced formal proofs and a published paper. [<https://www.researchgate.net/publication/382114208>]

Dr. J. J. Magdum College of Engineering

Jaysingpur, India

B.E. Project — Heart Disease Prediction using ML

2021

- Built and evaluated ML models (ensemble methods) using scikit-learn; applied feature selection to improve prediction accuracy on a reduced dataset. [<https://irjmets.com/paper/1628083338.pdf>]

CERTIFICATIONS

- AWS Certified Solutions Architect — Associate (SAA-C03) — Amazon Web Services
- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Data Science Methodology — Machine Learning with Python — IBM

ACHIEVEMENTS

- GATE CSE: **96.37 percentile** (qualified for premier NIT programs across India).
- Received **Spark, Inferno, and Accomplish awards** at Daimler Truck Innovation Center India for technical excellence and cross-team impact.
- Solved **500+ data structures and algorithms problems** on LeetCode and GeeksforGeeks, demonstrating strong problem-solving fundamentals.

INTERESTS & SPEAKING

- **Public speaking:** Presented project vision and roadmap to a **500-person town hall** audience, creatively framing technical goals as a Netflix-style series with episode arcs to maximize engagement and retention.
- **Creative communication:** Passionate about translating complex engineering narratives into compelling visual storytelling for diverse, non-technical audiences.
- **Automotive tech enthusiast:** Deeply interested in connected vehicle platforms, EV architecture, and the future of software-defined vehicles.
